Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art made of record does not teach or fairly suggest the combination of elements as recited in the following independent claim(s). Specifically, the prior art of record does not teach:

the management server controls the media agent to monitor for the addition or removal of a piece of media in the storage device, and wherein the management server is further configured to determine if the piece of media is either bar coded or non-bar coded and when a non-bar-coded piece of media has been added to the storage device or removed from the storage device, the media agent causes the storage device to read a media label stored as data in the non-bar coded piece of media, the media label including an identifier identifying the non-bar coded piece of media, wherein the storage device returns the piece of media to a slot in the storage device, and wherein the management server stores the identifier in the database in association with an indication of the slot.

The dependent claims being definite, further limiting and fully enabled by the specification are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
